DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to 1-24, classified in class 37, subclass 266.
 - II. Claims 25-30, drawn to a method of operating an earth –grading apparatus, classified in class 37, subclass 414.
 - III. Claims 31-36, drawn to a method of benchmarking an earth-grading apparatus, classified in class 701, subclass 50.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case invention I is the product and inventions II and III are two different processes for use. Processes II and III are two materially different processes of using the product.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
